

Web Usage Reporting

Know How Much Time Is Spent Online & Where

Web Usage gives us insight to how students are using in-class screen time, and allows us to update our web filters to guide them back to productive work. We also enjoyed the fact that we can ensure all of our devices are up-to-date.

DUARTE USD

As the classroom goes digital, remote IT leaders are faced with a problem of visibility. What are students using their devices for? What online content is accessed? For how long? Are they making use of available online resources?

With Absolute, you can now leverage **Web & Rising Web Usage Reports** to know what websites students are spending their time on, monitor the adoption of EdTech tools, and identify potentially harmful or unsafe web usage so you can take action.

BENEFITS

Gather detailed web usage information in a single console

See how much time is spent on each website, and how long each tab is in focus for — even if devices are off-network or users have bypassed web filters.

With this data in hand, you can:

1. Know how online learning tools are being used

Web & Rising Web Usage Reports let you know what websites students are spending their time on and monitor the adoption of EdTech tools. Drive better learning outcomes by identifying valuable or underused learning resources and directing students towards them.

2. Find violations and take action to prevent more

Know when devices access inappropriate or restricted content and respond remotely. Find restricted domains, see which devices have been using them, and take direct action with specific students. Use this information to update and improve your web filters. Reduce risk of non-compliance with CIPA and applicable student privacy laws.

3. Direct students to helpful resources to improve academic performance

If certain students aren't visiting the Learning Management System (LMS) or other online learning tools enough, Absolute can give you the visibility to intervene and help them improve. You can also find other resources that high-performing students are using, then direct other students towards them.

QUESTIONS WEB USAGE HELPS TO ANSWER

- How can I report to the board what students and staff are doing online? Are devices being used for educational purposes? What websites are students spending time on?
- Are students utilizing paid online learning tools?
- Are potentially harmful or unsafe websites being accessed by students?
- Is my school district CIPA compliant?
- How can I know how much web apps are being used in order to help curriculum designers improve remote learning?

EDITIONS

Web Usage reporting is available with Resilience for Education & Resilience for Chromebook for Education. For a limited time, Absolute has made this feature available to Visibility and Control licenses until August 31st, 2020.

Available for Windows and Chromebook Devices

Weekly Web Usage

Website	WEB USAGE During school	WEB USAGE Outside school	Devices	Category
www.google.com	2m	2m	83% 5 of 6	Web Search
